PRESS RELEASE

Zettagrid accepted to Government Cloud Services Panel

Zettagrid Pty Ltd, a leading Australian provider of infrastructure as a service (IAAS) today announced it has been accepted as a preferred tenderer for the Australian Government Whole-of-Government Cloud Services Panel, allowing Government users to quickly and conveniently consume Zettagrid resources in any of our nationwide cloud availability zones.

"As one of the select members of the Cloud Services Panel we're proud to offer Agencies immediate access to Australian owned Infrastructure as a Service." said Nicholas Power, COO of Zettagrid. "We have invested heavily in automating our Datacentre and Storage services to make provisioning and managing the Zettagrid cloud intuitive and convenient."

Cloud services are quickly becoming an essential part of many Agency's IT infrastructure. With unprecedented flexibility, consumption based billing and the ability to elastically match resources to ever changing business needs, Agency's unwilling or unable to make the transition to consumption based cloud services face increasing costs and administrative overhead associated with managing legacy infrastructure.

About Zettagrid

Zettagrid is an award-winning Australian provider of IT Infrastructure as a Service for business. Zettagrid offers enterprise grade, on demand data centre infrastructure with direct connectivity. Services are customised to help lower customers' capital expenditures, providing fast and free data transfer to and from the cloud, ensuring the reliability and flexibility businesses need. Zettagrid operates in more data centers than any other provider in Australia, with sites currently in Sydney, Melbourne and Perth.
