

IOSTOR

Deliver the performance required for any application. ioSTOR gives you complete control over the service level of your cloud storage.

AGIMO Data Centre as Service
Multi-Use List Member

STORAGE PERFORMANCE

Zettagrid ioSTOR is our latest innovation in delivering IAAS cloud storage. We have now revolutionised the way our customers can utilise cloud storage by offering tiered performance.

FLEXIBILITY

Every application has different needs. Mail and database servers have different I/O workload requirements than file and web servers.

ioSTOR gives you the flexibility to tailor your storage requirements to meet your application needs.

Achieve savings by matching your performance requirements to application workloads. Mail and database servers can reside of high performance tiers whilst large data archives exist in a low use tier.

CONTROL AND SCALE

Zettagrid delivers you unprecedented control to manage your environment. Scale up your environment to a high tier for a project and then scale back again. ioSTOR performance tiers can be changed at any time by logging into the Zettagrid My Account portal.

KEY FEATURES

- Mix and Match Tiers in a Data Centre
- Seamless live scaling between tiers
- Compatible with existing VDC and VPS
- Online Self Service

IOSTOR TIERS

ioSTOR tiers are based upon the IOPs (Input/Output Operations Per Second) delivered to your VDC or VPS.

ioSTOR is available in tiers from 100, 250, 500, 1000, 2000 and 4000+ IOPs.
