2 Service Description

2.1 What is Co-location?

2.1.1 Co-location is the service by which a customer provides IT equipment (servers, networking, backup etc) and locates this equipment within a ZettaGrid data centre in order to receive the benefits of a purpose built facility including physical security, power supplies and internet connectivity. This IT equipment is referred to as Customer Co-located Equipment (CCE).

2.2 CCE Supply and Installation

2.2.1 You are required to supply the Customer Colocated Equipment (CCE). ZettaGrid will schedule an appointment for the installation of the CCE into the data centre.

2.3 Equipment Access

2.3.1 Unlimited unescorted visits are arranged after a customer successfully completes a security application and site induction. At the completion of this process, you will receive an individual access code, swipe card and procedures. One access code and swipe card is provided per qualified plan. Access may be revoked where data centre or ZettaGrid procedures are not followed or your account becomes overdue.

2.3.2 Where you qualify for escorted visits, we will provide you with complimentary hours of escorted access per month during business hours as stated on your application. Escorted time does not accrue from month to month. Please provide 24hrs notice for a site visit. Where you require access outside of business hours, we will provide access to an on-call technician. Call out charges will apply. Where you require ZettaGrid to perform remote activities we will provide a technician to perform this on your behalf. Remote hands charges will apply.

2.3.3 We, or a person approved by us, may require access to your co-location space from time to time in connection with the provision and maintenance of equipment or Services. If you do not own the equipment, you must obtain the owner's permission for access and warrant to us that you have such permission. You indemnify us, or any serviceman approved by us, against a claim by the owner of the co-location space in relation to such entry on the co-location space. If you do not provide access as we reasonably request, we may limit, suspend or cancel the Services.

2.4 Equipment Responsibility

2.4.1 You are responsible for maintaining and insuring any equipment supplied by yourself. This equipment must be certified to be used in Australia. Where equipment connects directly to public telecommunications infrastructure, this must be ACMA C-Tick and A-Tick approved.

2.4.2 You will ensure that any equipment supplied to you, facilities and connections used in providing the Services, are not altered, maintained, repaired or connected to or disconnected from any power source or line except by a person approved by us.
