EQUINIX JAKARTA DATA CENTERS

Equinix helps companies accelerate business performance by connecting them to their customers and partners inside the world's most networked data centers. Our Jakarta partner data center is a business hub for many companies, and customers can choose from a broad range of service providers. Our Jakarta facility is located at Cibitung, which provides an ample and stable infrastructure of electricity, telecommunications, security and other support facilities. The Equinix metro Jakarta partner data center offers approximately 14,000 square feet (1,000 square meters) of colocation space.

Our Jakarta partner data center enables customers to be part of a rich industry ecosystem that is strategically located in the heart of the largest economy in Southeast Asia. The site is located approximately one hour from the Sudirman Central Business District. This state-of-the-art data center offers a full range of premium colocation, interconnection and support services to a wide range of secure digital ecosystems. These ecosystems, all operating as part of Platform Equinix™, include networks, enterprise, content, cloud and IT service companies, as well as financial institutions.

JAKARTA IBX® BENEFITS

- Strategic Cibitung location provides excellent supporting infrastructure of electricity, telecommunications, security and other facilities
- Available connections to secure digital ecosystems built by networks, enterprise, cloud, IT companies and financial institutions
- Indonesian democracy is vibrant and stable
