# 2 Service Description

## 2.1 What is VDC Backup?

2.1.1 Zettagrid VDC Backup is an agent-less, image-based (snapshot) backup service for your virtual appliances and file systems. This service allows you to backup your Zettagrid virtual appliances (VMs) to an offsite location and should something go wrong, restore the VM back to a point of your choosing.

2.1.2 You are able to order this service from the website, choosing which VMs to protect, the backup window and how many backups to maintain. Should you ever need to restore the VM, that functionality is made available through your "My Account" portal.

## 2.2 Image Restorations

2.2.1 Zettagrid will require You to perform your own Restorations via the MyAccount portal. This ensures that You accept full responsibility of restoring the snapshot over your existing virtual appliance or file system.

2.2.2 Where you require Zettagrid to manually perform restoration on your behalf, we will charge you for this service. You will be required to provide Zettagrid a written request from an authorised representative in order for Zettagrid to be able to perform this service.

## 2.3 Data Corruption

2.3.1 Zettagrid VDC Backup takes an exact copy of your virtual appliance. Where the source of the virtual appliance (server or desktop) backup is corrupted or misconfigured, this will be the snapshot that is restored. You remain solely responsible for snapshotting an appropriate version/configuration of your virtual appliance and securing the security access to your snapshots.

## 2.4 Data Retention Upon Cancellation

2.4.1 Upon cancellation of the service, VDC Backup snapshots will no longer available.

## 2.5 Contract Term

2.5.1 VDC Backup services have a minimum contract term of 1 month.

## 2.6 Billing

2.6.1 Your service will be automatically renewed on an ongoing monthly basis.

2.6.2 All Services are paid in advance. Adjustments (Upgrades, Downgrades, Additions, Removals) to your service are reflected in arrears.
