VEEAM BACKUP

Backup to the cloud with confidence. Veeam Cloud Connect Backup makes it easy for Veeam customers to extend their backup infrastructure into Zettagrid.

Zettagrid is an award-winning cloud provider of Infrastructure as a Service (IaaS), Backup as a Service (BaaS) and Disaster Recovery as a Service (DRaaS). We offer enterprise grade, on-demand data center infrastructure with direct connectivity. All services are fully automated and delivered without contracts to help lower capital expenditure (CapEx) ensuring the reliability and flexibility business need.
With availability zones in Singapore, Jakarta, Cibitung, Sydney, Melbourne, Perth, Adelaide and Brisbane, Zettagrid offers innovative and cutting edge cloud infrastructure to the whole APAC region.
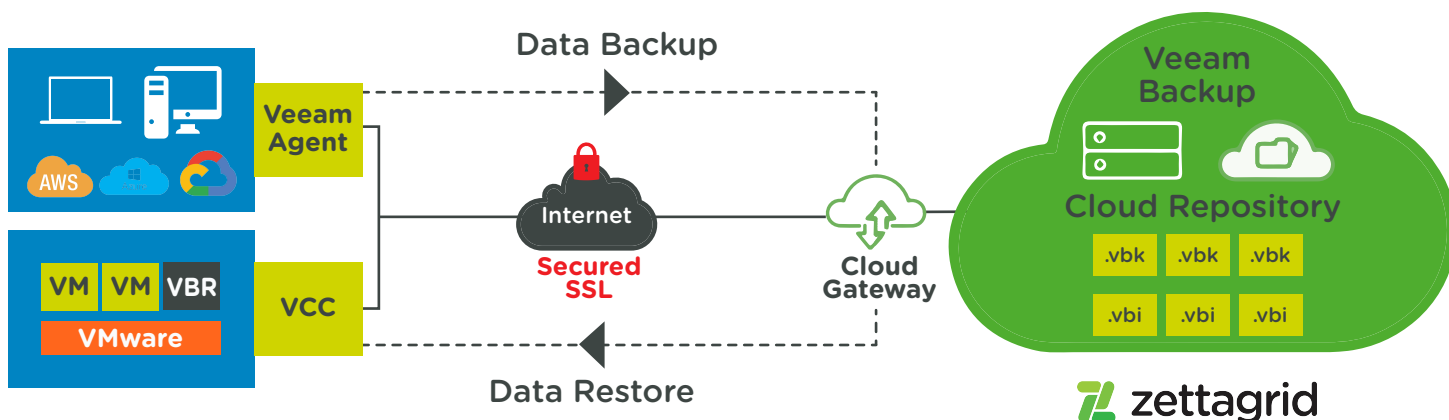

Offsite Backup with Veeam Backup

Veeam Backup provides cloud-based backup for your on-premise virtual and physical servers using Veeam Cloud Connect technology. You can store a copy of virtual machine images, files and databases from your on-premise site into the offsite Zettagrid cloud backup repository.
Easily restore a whole virtual machine, individual files or databases at any time from your Zettagrid online archive and get your users back to work quickly.

How it Works

Key Features

Simple offsite backups
Get offsite backup into Zettagrid cloud repository with no additional Veeam licensing required*.

Complete visibility and control
Access and restore data from Zettagrid backup repositories directly from your Veeam backup console.

Full Veeam integration
Add Zettagrid as your offsite backup target when you are running Veeam Availability Suite in your on premise site.

End-to-end encryption
Rest assured that all data at source, in flight, and at rest will be encrypted.

Unlimited data traffic
Zero charge for all of the upload/download data traffic for your backups.

Supported Environments

Desktops or laptops

Hypervisors
- VMware
- Hyper-V
- Nutanix

Public cloud
- AWS
- Azure
- IBM BlueMix
- Google Cloud

Benefits

No up-front investment
No need to invest backup software and storage to store your offsite backup.

Rapid backup and restore
Easy to deploy by adding configuration into your Veeam console. Start your offsite backup now.

Simple Pricing
You simply pay one all-inclusive monthly operational expense.

Local Storage & Support
Eight availability zones across Singapore, Indonesia and Australia to ensure your data stays close and with and 24x7 on-call support

Ready in minutes
Start backing up within minutes after signup.
