

SECDONDSITE DRaaS

Experience an instant, simple, and reliable disaster recovery with SecondSite DRaaS

SecondSite DRaaS simplifies your disaster recovery and business continuity strategy. Delivered through cloud, the service allows you to rapidly deploy a disaster recovery site without owning the technology, buying the hardware, and training personnel for your secondary site. Executing failover, failback, and disaster recovery processes is just one click away.

Built on the award-winning Zerto platform, the solution creates redundancy for mission critical applications and data which you need to recover quickly when catastrophic events occur, such as hardware failure, human error, natural disasters, and power failure. It enables near real-time DR failover and failback with RPOs of only seconds and RTOs of few minutes.

This service suits all businesses due to its scalability. Whether you are protecting one VM or 1,000 VMs, SecondSite DR stays as a reliable and affordable solution for small businesses and large enterprises.

Benefits for Business:

Business Continuity

Business Assurance

Ensuring Compliance

Significant Cost Savings

Scalable for small to large business

Simple plans with no contract
