

## SECONDSITE DRaaS

### Experience an instant, simple, and reliable disaster recovery with SecondSite DRaaS

SecondSite DRaaS simplifies your disaster recovery and business continuity strategy. Delivered through cloud, the service allows you to rapidly deploy a disaster recovery site without owning the technology, buying the hardware, and training personnel for your secondary site. Executing failover, failback, and disaster recovery processes is just one click away.

Built on the award-winning Zerto platform, the solution creates redundancy for mission critical applications and data which you need to recover quickly when catastrophic events occur, such as hardware failure, human error, natural disasters, and power failure. It enables near real-time DR failover and failback with RPOs of only seconds and RTOs of few minutes

This service suits all businesses due to its scalability. Whether you are protecting one VM or 1,000 VMs, SecondSite DR stays as a reliable and affordable solution for small businesses and large enterprises.

#### Benefits for Business:

**Business Continuity**

**Business Assurance**

**Ensuring Compliance**

**Significant Cost Savings**

**Scalable for small to large business**

**Simple plans with no contract**

**Simple and affordable monthly billing**

**Regional locations**

## Features:

On-premises  
Hypervisor-based  
replication

Full or partial  
failover and  
fallback

RPOs in seconds,  
RTOs in minutes

Deploy and test at  
anytime, day or  
night

Replication for any  
applications: SQL, Oracle,  
SAP and more

Easy and real-time  
compliance reporting

Integrated with  
WANs

## Use cases:

DRaaS is not solely for major events and insurance coverage but applicable for many more scenarios:

Replication and Disaster  
Recovery

Move from backup  
to long term retention

Workload mobility  
from anything to anything

Automated disaster recovery  
testing

Reduce RPOs and RTOs

One-to-many replication

Recovering from ransomware

## Sign up now and begin your DR journey in minutes

Replicate your on-premises data center to ZettaGRID cloud data center

Starts from

**\$104.50/month/VM/TB**

Replicate your existing Virtual Data Center to another availability zone

Starts from

**\$116.60/month/VM/TB**
